

Category	Action	Input Trigger	Requirement / Threshold	System Behavior
System	Cursor ON/OFF	Both Eyes	Squeezed $\geq 1.2s$	Toggles cursor_active. Visual progress bar fills; requires eyes open to reset toggle lock.
System	Keyboard ON/OFF	Voice	"Keyboard on/off"	Toggles keyboard_active. Allows or blocks all other voice typing to prevent accidental input.
Mouse	Move Cursor	Nose	Continuous	Maps the center nose landmark to screen coordinates (X, Y) using dynamic precision smoothing.
Mouse	Left Click	Left Eye	Closed $< 0.4s$	Performs a standard pyautogui.click() upon eye release.
Mouse	Double Click	Left Eye	2x Blinks within 0.4s	Detects rapid-fire blinks to trigger a doubleClick().
Mouse	Drag & Drop	Left Eye	Closed $> 0.8s$	mouseDown starts at 0.8s (Drag); mouseUp triggers when the eye is opened (Drop).
Mouse	Right Click	Right Eye	Instant	Triggers rightClick() immediately with a 0.4s safety sleep to prevent spam.
Mouse	Scrolling	Mouth	Open ($>$ Threshold)	Freezes cursor (X, Y) movement; scrolls vertically based on the relative movement of the nose.
Keyboard	Typing	Voice	Natural Speech	Transcribes spoken words and types them with an automatic trailing space.
Keyboard	Delete	Voice	"Delete"	Erases the last word or selected text.
Keyboard	Backspace	Voice	"Backspace"	Erases the last character or selected text.
Keyboard	Enter	Voice	"Enter" / "New line"	Executes a hard return (Enter key).
Keyboard	Space	Voice	"Space" / "Spacebar"	Specifically inputs a single space character.
Keyboard	Select All	Voice	"Select all"	Executes the hotkey Ctrl + A.
Keyboard	Copy / Paste	Voice	"Copy" or "Paste"	Executes Ctrl + C or Ctrl + V.
Keyboard	Undo	Voice	"Undo"	Executes Ctrl + Z to revert the last typing action.
